

## **Darwino Simplifies Development of Social Mobile Applications**

*Release of Darwino Community and Enterprise Editions Provides Platform Agnostic Enterprise Application Development Platform to Make Data and Apps Universally Available*

Orlando, FL - January 31, 2016 - Darwino, Inc., the provider of ground-breaking application development solutions, today announced the release of the Darwino Community and Enterprise Editions at IBM Connect 2016. Available immediately, Darwino enables developers to quickly and easily develop Mobile Social Business Applications that can run on any platform, connect to any application and any data source, all while being accessible anywhere - even offline.

"Darwino was designed from the ground up to be a comprehensive enterprise mobility platform," said Philippe Riand, CTO of Darwino, "With this release, we're focused on enabling developers to quickly create new social mobile-driven business applications as well as providing the ability to quickly extend existing enterprise applications to mobile devices while guaranteeing full functionality when disconnected from a network."

As part of this release, Darwino provides a full stack of data and business process-driven tools that enable developers to build social applications that can then be used on any mobile device or browser, freeing developers from the inherent limitations of particular operating systems. In addition, [DarwinoDB](#), a portable JSON store that also acts as a fully featured NoSQL database engine, gives developers the ability to add mobility to legacy applications - and futureproofing previous IT investments.

### **Darwino Community Edition**

The Darwino Community Edition is designed for non-commercial use. Compatible with any free database plan or trial plan, it offers a wide range of features:

- Extensive database support, including a no charge RDBMS, IBM DB2-C 10.5+, PostgreSQL 9.4+ Open Source, H2, or free IBM BlueMix plans.
- Enterprise Directory support for JNDI LDAP access, IBM BlueMix, and static files.
- Domino Connector with synchronization of up to three NSF per instance of each Domino server.
- Robust Community Support
- Access to all major releases.

In addition, Darwino will be extending database support to include Oracle Express Edition, SQL Server Express, and more in the near future.

### **Darwino Enterprise Edition**

The Darwino Enterprise Edition is intended for commercial developers and others who depend on periods of intense evaluation as they consider deployment of applications of their own. The Darwino Enterprise Edition includes everything available in the Community Edition as well as:

- Support for all enterprise RDBMS including SQL Server, Oracle, and DB2
- Use of database instances for multi-tenant applications
- Encrypted Mobile SQLite
- Unlimited Domino connectors
- Drivers for IBM Connections and IBM VMM Directory
- Access to all releases, including nightly builds.
- Darwino Support

Both Darwino Community and Enterprise Editions are immediately available for download at [www.darwino.com](http://www.darwino.com).

### **About Darwino**

Darwino, Inc. was founded in 2014 as a privately held startup. Since that time it has assembled an experienced, passionate and forward-thinking leadership team with both technological expertise and operational experience to develop the type of platform designed to shatter issues relating to data connectivity, mobile UI design, social-feature management and more.
